

## Standard Type Annular Band

Single Piece Band with Angles

Widths: 7", 12" and 24"

**Side View**

**End View**

Annular bands are used on corrugated steel pipe with annular recorrugated ends 12" back. Annular bands use either one or two sets (depending on the width of the band) of band angles, which are attached to the band by spot welding.

- 7" Wide Bands: have one set of 7" wide angles with two holes and include two 8" bolts.
- 12" Wide Bands: have one set of 12" wide angles with three holes and include three 8" bolts.
- 24" Wide Bands: have two sets of 7" wide angles with 2 holes each and include four 8" bolts.
